

TURNTABLE SPINDLE

REK-O-KUT S-320 MKII TONEARM DIMENSIONS & MOUNTING DISTANCES (NOT TO SCALE)

THERE IS A FEW MM DIFFERENCE IN THE SPINDLE TO ARM CENTER DIMENSION BETWEEN VINTAGE REK-O-KUT AND EMPIRE ARMS AND THE MKII. THIS IS QUITE SMALL, BUT YOU CAN TRY TEMPORARILY POSITIONING THE MKII AT THE OLD MOUNTING POSITION AND USE A CARTRIDGE ALIGNMENT GAUGE TO CHECK IF ALL IS OK. THERE IS PLENTY OF ADJUSTMENT RANGE BUILT INTO THE HEADSHELL SLOTS. TRY TO ACHIEVE THE 15 MM OVERHANG AT STYLUS TIP. WITH EMPIRE 598, MOUNT CARTRIDGE TOWARDS BACK. OTHERWISE, MOUNT THE MKII AT THE 8.43 DISTANCED.
